Thread: [Dehashed Hashed Password Help](#)

andydh22 - May 25, 2020, 4:51 pm

Hi Team,

I have signed up to dehashed and ultimately found the majority of passwords are hashed which I wasn't expecting.

I've got no idea what to do with them. I've tried searching the forum but I've not found any clarity as I'm unsure of what hash type they are.

Please could somebody help me with cracking around 20 hashed passwords?

I would be happy to communicate over PM.

Also would be willing to learn if theres a tutorial.

Thanks a lot for reading.

<https://hashes.com/en/decrypt/hash>

You can decrypt them there. If some don't work, you can purchase credits for other people to try and dehash them.
