Thread: [Need help regarding my skeet account](#)

Bear1337 - May 25, 2020, 10:23 pm

hey,

After a long period i wanted to log into my gamesense account and i was surprised by that my password was incorrect (the one saved in the browser which was backuped by opera's sync).

My friend helped me to contact W1sh and NmChris on Discord.

They were both helpful even when i was a bit retarded regarding my email as i use a lot of emails.

Wish asked me how did it happen as i had only one clue i told him i used a cheat back then which might had a backdoor but i wasnt sure though(i checked today i even lost my aimware account as well same goes with my interwebz and iniura account).

After a long suffering to get my login work and i finally logged in. i decided to change my email to my icloud one but i realized i wont get any emails on my icloud(maybe they thought gs is a spam) so i switched to my main gmail cuz that time i used different emails for all providers.

Bought a sub from same card like in the old days, asked for a hwid reset (like dude i had a different setup since 2019-september) and i found myself banned for account sharing.

tried to contact w1sh on discord he literally told to me to "stop acting dumb i dont have time for you" and left the discord group.

Wrote a support ticket but i didnt get any answers and this point i will feel like i will just chargeback my payment at my bank office and leave it alone, but i would be more than happy to see some solutions here or there nad i dont have ideas how could i contact mods/admins to clear it up.

1. Forgot email
2. Forgot password
3. Changed email twice
3. Different setup from the "old days" (september 2019\$
4. Different IP

If you were a staff member what would you do?

Maybe if you had a receipt for your new computer parts, and possibly your old Wish would likely help you.

1. yes, i am not perfect sorry.

2. not forgot, it was changed i think since i save my password to my browser's account (reason why is number 1 as u can see i forget things easily)

3i wanted to use a more in-use email, so i wont lose it or forget about it, i use my icloud because i check it on my phone every 30-60mins, but i stated why i had to change again as it wasnt working.

4. i switched to a gaming laptop i have recipt of buying it and proof of selling the old one on a second hand site, i can make a recipt for that one as well

5. i stated in my gamesense ticket every location with exact street number cuz dynamic ip can change anytime or ips can be changed.

in my support ticket i am provided everything i might need regarding the case, i just want them to read it.. i feel like they didnt read it or doesnt want to

and they banned my hf account? i find it sketchy tho :D
