Thread: [\[FREE\] Sirius Protector v1.0 Close Beta Test for 2 weeks](#)

SIM-3149568 - May 27, 2020, 5:24 am

Sirius Protector CBT Release
Powerful C++ based protector

FeaturesScantime FUD & Runtime UD

RunPE Supports both of Native & .NET 2.0 ~ 4.8 (inject into .NET processes)

Stub coded in C++ with no dependencies

Compatible with Windows XP / Vista / 7 / 8 / 8.1 / 10 x86 & x64

Ring3 API hook bypass

Hidden startup

Anti Debug / Sandbox / Virtual Machines

Compatible with many software.

Scantime result (0/36) :

https://kleenscan.com/scan_result/aecdfc9bc3a3846c915811f94ba1a77811905c065160be4165967f67d384c22f

Runtime result : Sorry, I don't have money to buy dyncheck :(
But on my VM, these AVs weren't able to detect my stub.

Ahnlab V3 (Used in korea)

Avast

Avira

AVG

Bitdefender

ESET-NOD32

Kaspersky

WindowsDefender

Beta Service Rules

1. Do not upload it to distributing scanner like virustotal, jotti, metascanner, etc
2. Instead use non-distribute scanners like antiscan, cyberscan, kleenscan, dyncheck, avcheck, etc.
3. This is beta service. Don't complain for developer.
4. Kindly report bugs to developer on telegram channel.
5. This service can be closed earlier with my opinion. Officially, this beta service is going to close on 2020-06-14
6. Don't do illegal activity with this software. Developer is not responsible for your action.
7. Don't offer paid crypting service with this software, but feel free to have non-public crypting

service to your friends.

8. I can terminate your license depends on your activity.

I only give license keys to upgraded members above L33T for 5 people. Post here and send me telegram message. Then I will invite you to the beta test channel.

Special Thanks

Supercut : Gived many information about crypter. Without him, I wouldn't be able to release this software.

VisualSoft : Assists on my question thread.

Kleenscan : This free scanner was very helpful to check scantime results. Thanks for offering free scantime scanner.

Jean-Jacques Rousseau - May 27, 2020, 8:06 am

Recieved a file. Reserving this post with updated information.

[Edit]

Sophisticated ring3 unhook. Basic anti-debug. Classic RunPE injection, nothing new. Heavy dependency (CRT, TLS), this needs to be removed to be practically viable, both for executions rate and for bot support(in memory exec). Good entropy.

SIM-3149568 - May 27, 2020, 8:11 pm

4 Slots left to use. Feel free to test this just post here and contact me on telegram or jabber.

VisualSoft - May 28, 2020, 6:40 am

thanks for the credit, but i haven't done anything more then answering few of your queries.

R A Z - May 28, 2020, 7:43 am

Goodluck!

If you have dyncheck then, I will give you licenses. Otherwise, license will not given.

SIM-2866927 - May 29, 2020, 2:08 pm

Hey are you still giving licenses? can I get one if you are still giving , thanks

SIM-3149568 - May 29, 2020, 4:44 pm

Do you think shared one can make great result? It would be detected quickly. And you can ignore this thread if you are not interested on this.

Clay davis I wasted my time by replying you.

0x4D - June 3, 2020, 7:25 pm

please can you crypt a file for me and i will test WD

Vagabundo Legendario - June 4, 2020, 8:55 am

Seems nice , good luck whit your product

SIM-3149568 - June 6, 2020, 7:18 pm

Closed for private reason. Sorry!
