Thread: [+2000 FREE WordPress Themes & Plugins | WP-Tools](#)

Krysis - May 27, 2020, 6:33 am

Hello HF.

I created a [website](https://wp-tools.ru) (<https://wp-tools.ru>) that stores about +2000 WordPress Themes & Plugins, where everyone are able to download as many as they want, completely free of charge with no limits! ?

The themes and plugins does not come with activation / license codes. But if you like the themes / plugins made by the developer, make sure to buy it from them to motivate them to keep making them. ?

Grab all of them if you want. All themes and plugins are being updated every few days. Also themes and plugins are being added from time to time.

Enjoy the freebie! All kinds of feedback is much appreciated! ???

Just added Virus Scan for all.

Bump!

Sounds great, but how do we know it can be trusted? :D

There is a Virus Scan page (check out the navigation menu), where I show how to scan the files for virus before it reaches your PC, step by step.

A really good stack of resources. How about adding html pages aswell? That would be icing on the cake

Oops! It seems that at the moment I cannot enter your website, I do not know if it is a problem with my browser or your hosting. Anyway, I hope I can visit it very soon because what you say sounds great, thanks for sharing this with the community, buddy. :)

I removed the website, since everyone thought this was viruses. I might start is up again next month, but I am not sure if I do.

It does in fact take some time to manage and all, but if everyone thinks it's a virus and don't download them, then this is just a bit of waste of my time honestly.

What a pity buddy, I was really curious. Why don't you try adding an SSL certificate to build more trust? Anyway, courage, I hope you continue to share your contributions and that there is someone who can value them.
