Thread: [\\$550,000 USD Call](#)

DNA - May 27, 2020, 10:53 pm

I am now confident in my prediction of \$550,000 USD by the end of 2020, latest prediction is for end of Q1 2021, earliest end of Q3 2020.

Coft - May 27, 2020, 11:24 pm

Are we the ones who must guess the crypto...?

SIM-4339250 - May 27, 2020, 11:24 pm

\$550,000 per BTC?????

Damn you're REALLY optimistic.

DNA - May 27, 2020, 11:31 pm

(May 27, 2020 11:24 PM)Coft Wrote: [\[CITE\]](#) Are we the ones who must guess the crypto...? Whom predict*

(May 27, 2020 11:24 PM)Ninety Eight Wrote: [\[CITE\]](#) \$550,000 per BTC?????

Damn you're REALLY optimistic.

Actually I'm not, I'm simply observing the data presented and giving my observational predictions.

The only prediction of mine that was incorrect was my \$1500 call.

SIM-4339250 - May 27, 2020, 11:32 pm

Well you're still optimistic about the price. I'm not sure what analysis you did that gave you 550k but I do hope you're right my friend. I'm thinking something closer to \$70K.

Simplicity! - May 27, 2020, 11:55 pm

Well now, that's a very unrealistic prediction, innit?

DNA - May 28, 2020, 12:21 am

(May 27, 2020 11:32 PM)Ninety Eight Wrote: [\[CITE\]](#) Well you're still optimistic about the price. I'm not sure what analysis you did that gave you 550k but I do hope you're right my friend. I'm thinking something closer to \$70K.

Honestly, a majority of my predictions come from DRL, however I do alter the prediction a majority of the time, although in saying all that, my app only projected 327k, I feel that's not correct and that my neural network isn't taking everything into account correctly.

Whatever the reason, I feel 327k was possibly incorrect and it will reach 550k.

(May 27, 2020 11:55 PM)Simplicity! Wrote: [\[CITE\]](#) Well now, that's a very unrealistic prediction, innit?

If my app predicted 327, I believe 550 to be very plausible.

For the record, my application has thus far, returned an accuracy of 82.369% (why down to the third decimal? I want it as accurate as possible without being pedantic) for the past 90 predictions

(unaltered).

With everything considered, 550k by the end of Q1 2021 is more than plausible.

LOL, you are saying a lot of things without basing them on any fact. How have you come to this conclusion? What is your analysis? "Feeling" is not an accepted answer...

DNA - May 28, 2020, 12:32 am

Are you stupid or just ignorant? You literally just quoted my explanation on how I use Deep Reinforcement Learning.

SIM-3867235 - May 28, 2020, 1:10 am

Show me proof of this. What is this app that you are talking about? How does it make predictions?

DNA - May 28, 2020, 1:13 am

(May 28, 2020 01:10 AM)waytoosplashy Wrote: [\[CITE\]](#) Show me proof of this. What is this app that you are talking about? How does it make predictions?

I can when I am in the office again, the application is proprietary, it makes predictions based on multiple factors, some of my graphs also factor in the stock market, this is why I see that NASDAQ is very closely related to BTC in paternalistic behaviour.

Olympus - May 28, 2020, 1:20 am

Bro you are so out of line it is not even funny, i can't tell if your being full troll or your just that retarded no offence we are all retarded at the start but we learn and become better at being less retarded but bro you are a full blown retard at this point and i don't know what to say besides this. Forget everything you know about crypto and trading and go back to the start and never think you know more then others because you simply don't, there is always someone more knowledgable on a subject. I'm not saying this to give you smack i'm saying it to give you constructive criticism to benefit from the situation you are in right now, all the best mate i honestly like your optimism people with your optimism mixed with a good imagination have no limits but remember you don't know shit always learn.

Flash ? - May 28, 2020, 1:21 am

You were bearish af on last thread now you are bullish af? Did u calculate how much the market cap

would be if we go to 550k? We are at around like 100b mc for btc and u are calling for like 9T mc.
Pretty funny
we didnt even make a new high yet and u calling 550k lol crazy bro

Btw i hope this is sarcasm lol

Olympus - May 28, 2020, 1:24 am

Like a 9 trillion market cap is possible but definitely not on bitcoin at this point in time maybe in a couple of years similar to gold. Some of the upcoming alt coins though have more potential then bitcoin in terms of mass adoption just because of there real world use cases and the fact everything will eventually flow through them rather then fiat.

SIM-3867235 - May 28, 2020, 1:33 am

Yeah i know gold has 9T MC. Currently btc isnt even showing enough strength to make a new swing high so we'd be luck if we go back to the old 300b MC rn

(May 28, 2020 01:36 AM)Source Wrote: [\[CITE\]](#) Imagine if op was embarrassed and he actually is that sure and we just changed his mind... LOL

Nah man, my neural network sees all

Olympus - May 28, 2020, 1:41 am

(May 28, 2020 01:36 AM)DNA Wrote: [\[CITE\]](#) Nah man, my neural network sees all

Yes i like this, all brains work there own ways train the mind to learn new things and create new neural pathways to create new perspectives. Isn't that food for thought. How are you meant to see the spirit world if you have never seen it, it's like when your a kid you see ghosts or hear things that are unexplainable to a adult perhaps they just lossed the connection to the other side. Or perhaps the people who see ghosts are just crazy, whats the difference... ???

I would rather be able to see what others can't that's for damn sure. Seeing is believing.

I think the strategy here was to just set a date further out so he can troll longer. Probably just bought some coin and wants it to go up now.

(May 28, 2020 02:02 PM)DNA Wrote: [\[CITE\]](#) Lmfao, even the admins are taking this seriously. Calm your tits
