So with a 40\$ investment you can make 660\$ per month? Have you attempted to scale this further than 40\$? Say 100-200\$? If you can please message me more info regarding the product and what we would need to be able to run it. I would like to purchase this method ASAP. Also, please include your discord, thanks!

First payment will be around 45 days after (sometimes earlier depends when you setup) and then from then on it will every month at a specified date.

You will always make profit, that's for sure, accuracy isn't 100% (because of some situations) but you can have a good rough estimate on what you're gonna earn. Main setup is the first 2 days where you should spent about an hour each making the initial setup and then from there you're good to go. I recommend doing a few extra tweaks here and there which are mentioned in the guide, but this isn't time-consuming at all :)

Third one is coming soon, it will be a big payout too. My method will show you how to do it properly and if you need support I'm available to support you on having success with this. I have no intention to scam, I want to be a reputable member of HF. This is an investment, not a bs e-book on how to make \$500 in a day, this will work and your investment (even if it's small) will be rewarded.

You can have \$10,000 to invest in the first month, you won't get any money because you will get caught. This is all about patience and scaling overtime.

PM me your discord. Interested in purchasing this, but Id love to discuss it a bit further.

Since this involves Spotify, do you have to be your own artist with your own music?

Seems interesting cause if it's based on a numbers game then it's possible, correct?

You do not need to put be an artist or be able to create your own music.

Purchased this method a few days ago. Ive been too busy to actually set it up yet. It will take around 30-60 minutes of work to set everything up, and then a few days more to actually start profiting. The one drawback is the regular payout is once a month, and takes up to 45 days for your first payout. The method itself is very simple, and OP has laid everything out in an easy to understand format. I only had to ask him a few questions to get a complete grasp of what's needed and what to expect. Overall investment is extremely cheap, and the potential returns will grow slowly month by month for safety reasons (you dont want your account to be banned). Obviously I can't rate this method based on its success, due to the long payout time. However, this does seem like a very good long term investment as the cost for the method is so low. Spend 10 minutes a week scaling this over the course of several months and I truly believe you can see returns as much as or more than OPs proof of payout.

Ive been wondering something. If this method works for Spotify, can it also be applied to the other similar platforms like Napster, Tidal, Google Play Music and Deezer? I mean can the same principle work on them?

update my review once I hit my first payout but so far the method has a great income potential for the long term if you do it right.

That's really misleading, as it's definitely not an 'allowed thing to do'. This is definitely greyhat if not blackhat.

well if you search around, thats what I did before putting that statement, it seems to be considered legal but then I misread that perhaps, in that case its greyhat like you say I guess. Anyway to me blackhat means, caught = prison, this will have no consequences, maximum you'd have to do is start from scratch xD

I don't need to search around. In your original post, you said it was an 'allowed thing to do'. The method works, but if you think you are 'allowed' to do this, then I would consider searching around a bit more.

I'm just making this post so that you don't mislead anyone.

I literally just said "I misread perhaps", by posting it like that you make it seem I'm trying to mislead people on purpose which is not the case. Also I said " in that case its greyhat like you say I guess" . So not sure what your point is of the additional comment after I corrected myself saying that it is greyhat?

I've been doing this method since around January. If you so much want your money back, then you can, even though you broke 2 terms of service rules:

[*]Leaking or sharing information on this method will result in you no longer being eligible for a refund or any exclusive support.

[*]Do not leak this method in any way.

Though it is technically private, because of the method I use and my own tips and tricks I share with people, I never ever stated it was "private" so I'm not sure what you're quoting there pal. If you truly want a refund, contact me on discord.

Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.
