Age: 21

Skills: Intermediate level of programming in Ruby, advanced level of experience in web design (HTML, CSS, frameworks such as Bootstrap) and being a webmaster, currently gaining skill and practice with SEO and content marketing strategies, a high level of skill in writing for the web and for writing in general.

Why do you want to join the group?: I would like to join Masterminds because I feel it would be an interesting, and potentially rewarding, experience to join a group. I think I can share some of my knowledge, as well as gain some from others. It would be a cool experience to join a close group such as Masterminds where I can meet new people on HF individually, rather than just interact generally on threads.

What do you think about Masterminds: I haven't heard too much about Masterminds, until I just recently saw members of the group popping up on threads. I'm interested to learn more about the group and see what it has to offer, however.

What can you bring to the table?: I believe I can bring some of my knowledge of being a webmaster and creating content to the table. It's a topic I'm highly enthusiastic about and am always trying to learn more from people who know more than me. Beyond that, I can bring a high quality of interaction to the group. I think of myself as someone who interacts well with others and I always try to show others the best version of myself. If I get the opportunity to join the group, I would try my best to be as involved and integral as possible.

How many hours a day are you online: I would say I spend roughly 4-5 hours a day online, sometimes more if my schedule is freed up.

How good do you think your grammar is on a scale from 1 to 10 (Where 1 is the lowest, and 10 is the highest)?: My spelling and grammar is a 10 (I study English in college).

If accepted into the group, will you be active in the sub forum: If accepted, I will try to be active in the group sub-forum to the best of my ability.

Stanley - June 17, 2020, 8:59 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

MarvinMalware - August 2, 2020, 8:15 pm

Name: Shoto Todoroki

Age: 20

Skills: Writing, creativity, logical thinking, and problem solving.

Why do you want to join the group?: I believe this group represents something new users can look at and learn from and I'd love to be apart of that. The userbar, post stars, and character colors of the group are incredible as well. I'd be honored to be welcomed to this intellectual community. One thing I enjoy about hack forums is the ability to learn endlessly, being in multiple groups I find it opens more doors that allow me to bounce ideas between members and learn from them as well as share my ideas. My former experience is not too wide I've previously had some use of RAT programs, as well as extensive research in social engineering. I have a tiny bit of basic knowledge in Lua from running a few Garry's mod servers a couple years back.

What do you think about Masterminds: The members of this group seem to be extremely high quality and mature with their posting, I appreciate that. To add to it all the group is very select on who they let in it seems, meaning it allows the group to remain tight knit and leaves the members to hold each other accountable. Masterminds also is one of the few groups I've noticed that is not yet advertised like it's a product in a store, rather it stands for something more meaningful.

What can you bring to the table?: Frequent activity in group discussions and posts. High quality and interactive threads and posts that will represent that userbar with integrity. I have little career background that allows me to share too much extensive knowledge but I am currently working on enrolling in school and looking into the networking field. I'm also slowly learning and reading up on python in my free time.

How many hours a day are you online: 2-3 hours, I'm frequently checking my notifications through the mobile version of the site throughout the day along with my usual browsing on my desktop.

How good do you think your grammar is on a scale from 1 to 10 (Where 1 is the lowest, and 10 is the highest)?: 8, I take pride in my ability to write well with a mature tone and decent grammar.

If accepted into the group, will you be active in the sub forum: Absolutely.

Thanks for choosing me bro , i think im the n1 here thanks again ! I will be glad ! Thanks god ??

Name: J

Age: 23

Skills: My skills include, but are definitely not limited to being an extremely efficient multi-tasker, accounting, writing, 4-5 years of both coding and database languages and a few years of instructor taught graphic design classes in school. I built up a family real estate company from the gutter and now have over 11 Remax offices that my associate's real estate group owns, to which I do the finances for. I also have excellent verbal and written communication skills, utilize what I have in front of me to learn as quickly as possible whilst doing many other things, and personality wise I am one of the most well rounded people you will ever meet if you simply get to know me.

Why do you want to join the group?: I am looking to expand my connections with other HF vendors, SEO gurus, and those who seek both knowledge and the means to monetize; as well as brainstorm new ideas for making money, and overall connecting with people I have stuff in common with. The more connections you build, the more to your arsenal and that goes both ways.

What do you think about Masterminds: I think that it is by far one of the best prospects via groups right now to be honest. It's probably also one of the best user bars I have seen on here. From looking at the roster, there's a lot of talent in this group as well and other members whom know me. What I like the most about it though; is that it fits perfect for someone like me who does many different things IRL and on the internet. Joining would definitely benefit both sides. I think the name also speaks for itself. This group is meant for people who are critical thinkers and know how to properly make money.

What can you bring to the table?:

Well, this is a very tough question because I've been involved in software development and online monetization since the times of Liberty Reserve where I lost thousands of dollars... To answer your question in short: I like to consider myself a Jack of all Trades. To put this in perspective for you, allow me to explain.

1.) I currently own 2 MMO private servers, one of which being the top 10 most popular in the world via votes on XT100. Players donate and vote for gear and other such upgrades. Our pricing has been carefully preset and we have an integrated armory for 3 realms on 1 server that is accessible through our website and logging into your account. We also have one of the most trafficked and active forums of any other server from what analytics say. The second project is still in Beta testing and has been for the last 8 months. It is used more as a test server currently for the one that is full public. Eventually it will be introduced and merged as 1 server when complete.

Since 2012 myself and 2 others have generated well over 6 figures. Profit is split monthly at 33% with a 1% KITY.

2.) I have firm understanding of online SEO. HF is my secondary platform and I am slowly moving away from the other. Part of this experience comes from owning and operating my server and generating revenue via PPC, VIP buy-ins (similar to a paid group on HF), and a conversion gossip NPC that allows you to transfer Vote points to donation points and vice versa.

It is not uncommon for someone to buy \$5,000 worth of gear for 1 single account. Prices are fixed to a universal currency that we only use for donating. It's a simple marketing strategy. You set fixed prices for x amount of donation points and set the amount of points gained from the price. So if someone wants to purchase a helm, it would cost \$22. The only options to buy are in 10 dollar

increments. So the player is forced to purchase \$30 worth of coins because the item requires \$22. A lot of retail stores do the same thing. So you'd be left with \$8 and from a sales standpoint that goes A LONG WAY psychologically for the buyer who's hooked on your product. Players see that they have x amount of coins in their account, so they will then have to purchase \$10 again, bringing their balance to \$18 in order to purchase the item that would otherwise of been deducted from their balance. Hopefully this makes sense.

3.) Offshore bulletproof VPS hosting at a 25% discounted price versus what I would charge elsewhere. Panther and Brotherhood members only would receive this discount. A thread will be coming to HF soon.

4.) Investment advice and how to make thousands online a month by just advertising your company (real estate only for this one) all from the comfort of your own home. It was originally going to be an e-Book here, but you need a Broker's license in order to be able to do this properly OR know someone with one. ;)

5.) Verified eBay and Mercari accounts and so much more. I don't want to make my application too long or sound like I am bragging.

6.) SWIM is a vendor on Empire with 172 positive reviews for my products and as well as a couple other more underground marketplaces operating via TOR network. All Panther and Brotherhood members would receive discounts on all goods if I am accepted.

How many hours a day are you online: It depends. Lately I have been checking in for about an hour a day, but today I was browsing for quite some time trying to help people out. Approximately 2 hours a day I would say, but the last 2-3 days it's been closer to 8 hours. What I need to begin doing is building up this profile now in order to start using the MP more effectively now that I am a little less busy these days. I wasn't wanting to dive into HF but now that I have the feel for it, I am ready to begin releasing certain services and much more soon.

How good do you think your grammar is on a scale from 1 to 10 (Where 1 is the lowest, and 10 is the highest)? I like to consider myself as having impeccable grammar. This is actually false. When I go back and re-read much of what I write; I find myself slipping up sometimes. I am not a grammar Nazi at all, but I do like to be professional. I would give my grammar and overall language art skills a 9/10. Nobody is perfect.

If accepted into the group, will you be active in the sub forum: Of course! I am looking to build connections and meet new people from HF after all as well. It would be nice to have some mature and fun discussions there. I'd be active on Discord for the same too, of course.

What do you think about Masterminds: A group that is limited only to the most creative members on this forum. It requires you to actually have skills and not pay to join. Thus making the members respected and admirable while holding the name Masterminds!

What can you bring to the table?: I can bring myself present on to you without taking a shower and most likely with dark circles around my eyes and foul smell because of Over Studying and Constantly worrying about life problems. Nevertheless, I'll still hug you <3

If accepted into the group, will you be active in the sub forum: Only if you grant me the permission to post there :)

?ystem - August 18, 2020, 1:31 pm

Name:

Just call me System, I prefer to keep my real name away from public eyes. I'm sure you can understand. If accepted, I would have no problem sharing with the group.

Age:

Normally I would keep this private but considering how I was cryptic about my legal name I'll share that I'm 30.

Skills:

I'm well-experienced and trained in many fields and subjects. Extensive knowledge in the fields of astronomy, cosmology, criminal justice, information technology, and psychology. Intermediate knowledge in .NET based programming languages as well.

Why do you want to join the group?:

As is said in the original group post, "We strive to help the community of HackForums by spreading knowledge and wealth." I am a firm believer that knowledge is precious, that one should never settle on knowing "enough", and one should share their knowledge freely and help people when they can. You never truly know just how much one can affect the world by just helping those in need of help.

What do you think about Masterminds:

To continue on with what is said above, I believe in the message this group is providing to the great question of its purpose. Genuinely, this group serves a purpose and I would very much so like to be a part of it.

What can you bring to the table?:

I can bring very much to the table in the way of helping those in need, to enlighten those who live in perpetual darkness due to their hardships. Many kind people have been there for me in my time of need and I would love to do the same for each and every other person who is where I once was.

How many hours a day are you online:

I'm online every day for hours on end, even when at work I will continuously check to see if there are any messages that need responses. I'm a fairly active individual with free time that I believe is best spent in the aid of others.

How good do you think your grammar is on a scale from 1 to 10 (Where 1 is the lowest, and 10 is the highest)?:

There's one to two errors in the grammar of the question I'm answering and the one below, but I would say I'm roughly an average eight. There's always area for improvement and I am by no means a master of English.

If accepted into the group, will you be active in the sub forum:

Very much so, yes. I enjoy discussing various topics of interest with my fellow people and especially members of our community.

Xamarin - September 16, 2020, 9:27 am

Name:

Michael ... even though I prefer people to call me Mike.

Age: 21

Skills:

Programming and security. In terms of programming, I know and use: HTML/CSS, JavaScript, PHP, C#, C/C++, ASM (Intel and ARM). As for my security background, I am currently working for an info-sec company doing code auditing.

Why do you want to join the group?:

I want to broaden my knowledge regarding business, investment and marketing. At the same time I want to get to know some bright individuals that I can interact with, and in general start surrounding myself with decisive people willing to work.

What do you think about Masterminds:

I don't think anything really. I have seen posts of members that are currently on masterminds and I find them really nice, but I have no other opinion shaped about the group or its members.

What can you bring to the table?:

Short Answer: My knowledge regarding computers.

Long Answer: Answer questions, potentially solve problems that other members have, and even guide them if they want to start their own path in any computer science related field. Don't get me wrong though ... I am not going to take anyone by the hand. What I will do instead is listen, understand what they want to do, and then give them some guidance of how to get where they want to go. If they need help along the way, I'll be there to guide them again.

How many hours a day are you online:

It heavily depends on my schedule, but I'll say around 3 hours per day.

How good do you think your grammar is on a scale from 1 to 10 (Where 1 is the lowest, and 10 is the highest)?:

Uhh. Very hard to comment on this one. I'll say I am a solid 6.5, but I think I've talked enough throughout this application for anyone to decide if that's true or not ?

If accepted into the group, will you be active in the sub forum:

Participating in group discussions is the reason that I am eager to apply on this group since the creation of this recruitment announcement ... so the answer is a big fat YES.
