Oh damn that sucks. Hopefully stuff start to go back to normal soon

I'm incredibly boring, but it's just the basic Mac OS dark mode sand dune wallpaper. I'd like to change it to something more lively at some point, however. I used to have a picture I used on all of my computers, but I don't know what happened to it.

Cooligan - May 30, 2020, 12:36 pm

I'm on vacation atm so I'm not on my main PC but I've been using the same wallpaper for probably close to 7 years now. Put it on at the start of me joining HF, probably a month or two after I joined after seeing a user upload it in the Photography section.

So in essence I've been using some random HF member's photo that they took back in 2013 of a random lake with a nice dock lmao.

Oh and it's black and white.
