Hi, I'm selling rubles/items/carries for the current wipe.

1mil = \$3.2

No bulk offers as of now. If you have someone offering a better rate, provide proof and I will match the price by 5%.

1 Raid Carry (any map) - \$9

I will kill all players and loot for you, then drop your bag at extraction.

If you want certain items, we can work out a price.

BTC only for now.

If you ever change your mind let me know. If you're worried if I reclaim the payment back just check my history, because I won't.

Hey there, which will be more profitable? The raid carry or roubles?

Interested in the roubles what method do you use to transfer roubles and how do you cover flee market fees if so
