Hi Folks,

I just wanted to know what is the meaning of Office silent exploits? is something associated with vulnerability (CVEs)?

Example:

cve-2017-11882 is RTF vulnerability is also we can call the silent office to exploit?

What all comes under Office silent exploits?

Thanks,

? I guess Yes, Any different opinion on silent office exploits here?

Similar exploits we can call office silent exploits. In others words other then macros.

cve-2017-11882

cve-2018-4878

cve-2017-0199

CVE-2019-1458
