Thread: [Laravel // PHP // .NET // C/C++ // ASM Freelance Programming](#)

log dot zip - May 31, 2020, 12:37 pm

I have been working in the industry on private projects for the latest years, that's why I've been taking a break here on HF.

Back ready to get working on some new projects.

Taking BTC, LTC, and XMR as payment.

I'm doing all kinds of projects, pitch me your idea. I can do it.

Discord: Ruse#2102

For the last 1.7 years I worked at a cryptocurrency exchange as a backend developer.

I do not take freelance jobs under 100\$, and I will never provide hacky/non-maintainable code.

All PHP projects will be coded using Laravel standards. For vanilla PHP PSR standards are used. For C#/Visual Basic I follow the Core standards, which allows crosscompilation.

For ASM requests, let me know what you need. I may or may not be able to do it, depending on the architecture.

Looking forward to doing business with you.

If you add me on Discord, we can discuss further. But yes, it's possible.

What is your discord? I'll add you now

SIM-119661 - June 10, 2020, 5:20 pm

Im very stupid, sent him 300 \$ for a job and then when he received the bitcoins he blocked me on

Discord

I don't know why I trusted this guy without checking.....

My own fault

<http://visedeg.no/images/ubk5wcewx1hstkkh8o7h.png>

SS of last message and me confirming the BTC have been sent
