Thread: [Do you see what this number is? \(color-blind test\)](#)

Aklimczak522 - June 2, 2020, 7:49 am

Another fun thread, but also interesting one. You can check if your sight works good when we are talking about colors. A lot of men are color-blind. Women percentage in color blindness is much lower.

I guess for me I just need some eye drops for my eyes. This week I am going to see a doctor for my check up. I'm feeling unease lately so I guess I need to act early about this matter :)

Swedish Delight - June 8, 2020, 10:27 am

It seems to be 74 but if you consider only the strong greens it becomes 71, i guess it's to judge the level of colorblindness if the person can't see the full 74?

BTB™ - June 8, 2020, 10:51 am

71 first and then 74.

Actually for a single color its 71 and for dual color its 74.

Cheers.
