If you mean that you would like to create your own bitcoin paper wallet with a private key, then do so on this website:

<https://www.bitaddress.org/>

If anyone knows your private key they can hack your bitcoin, so I would advise keeping it to yourself and yourself only.

Omniscient - June 3, 2020, 11:03 am

Or you can use the HF Tool we have.

You can't just generate the private key for particular public addresses

Well you could, it would just take tens of thousands of years with a supercomputer ?

emmyslim2015 - June 5, 2020, 7:44 am

Bro i have a bitcoin account total balance is \$25 million usd and this funds are spread to 5 btc address in one bitcoin account and the funds is showing non spendable and while trying to make

transfer it is requesting for the private key in order to allow the funds to go through
please help Thanks
