Thread: [\[Discuss Spreading\] 100% FREE RAT Service - Test Bots/Private FUD Crypts \[Amazing\]](#)

NextGeneration - June 4, 2020, 1:47 am

Hey HF

So I'm being a bit of a do-gooder and going to get reputation and well known on HF now. I have never been a member of HF properly. So this will be a blast! ?

I'm offering free bots and free long lasting private FUD crypts (for certain RAT's) I recommend Async as you can then upload to memory your other malwares and bypass AV.

So... what's up? Can we turn this into a discussion thread too? I'm interested in buying your spreading methods too. Any unsaturated ones I will pay top dollar for!

Any helpful posts appreciated! I only just started ratting again about a week ago, and I've just hit 600 bots spreading with Async. So I'm doing okay.

What do you guys look out for in the passwords though? I mean what would a cyber criminal look for? I know there's dangerous criminals that hack BTC but this is becoming increasingly hard due to 2FA. I have so many logs but it's pointless IMO without reverse proxy/email access.

Why do you rat? Don't post anything incriminating if you can't ?

VisualSoft - June 4, 2020, 2:56 am

I would suggest you create separate threads for offering and discussions.

Both together will basically confuse new users.

BTW you are doing a good Job.

Thanks for the free installs and crypt, sir.

Would recommend!

You're welcome. ?

Hey guys, to get the spreading discussion going here's a link to the best tool to spread with IMO. It's a builder for the shortcut (.lnk) exploit. kalilinuxtutorials.com/lnk-kisser/ change the icon to a notepad icon and you're good to go! You will need to edit the number from 154 to 2 if you want to change icons and it still work. Any questions I'm here.
