Thread: [Ratting: Someone had "Bank details.odt" on their desktop lol :o](#)

NextGeneration - June 4, 2020, 2:56 am

I found a random Australian bot doing some shopping. As he was going to checkout he was copying his card details from a document. I saw it was "Bank details.odt" on his desktop. ???

It not only has 6 of his credit cards in there, it also has his bank logins. ?

I've now helped him uninstall the malware from his computer and told him to change his bank details and order new cards. ?

Crikey! Some people need to be more careful.

Not sure why you post this 'heroic' thread in The Lounge, but I'm glad you helped the man.. if it's true.

Other people would take advantage of it, so again, if it's true, I respect you for helping him out instead of robbing him.

I clearly have to say that you are a smart (most likely) multi-account / fraud.

Sharing some story about finding 'credit cards' and 'bank info'.

Creating a service thread (free) where you crypt servers for l33t/ub3r members

Joined today.. "new" too HF. Sure..

So you joined today, figured out what the l33t/ub3r upgrades are for. And already offering a free service for RATS..

Hello dear friend,

You know exactly who I am. Neg repping me has earned you nothing but doom. You reap what you reward!

Just do us all a favour and log out kiddo. You are smart, but no where near as intelligent as other members.

I've never claimed to be smart.. though I am proud of being like an "on-game skid" that knows how to make money. I think there's more important stuff than hacking. But I love it. Thanks for posting on my thread.

I know you don't like me, it's pretty clear. You have a massive ego and shove your e-penis everywhere with your -rep, very cool. I was literally just replying to be notified on his response of what he was talking about with the reap stuff.

Keep the LQ large ego posts on random multis getting into random peoples shit and over convo's saying you want \$15 for people to add you on discord to talk. Scum.

You're a fraud, that's nothing to be proud of.

Rather use your time to actually work for a boss or become a freelancer, instead of abusing your mothers' living area for your personal gains and lazy ways of making money. Done posting here, you won't last for long.

I have 600 freelancers on rat right now that I could get to code me anything I want. Why would I

become one of the 600?

I know you see me as a fraud, well, news flash kid... everyone in this world is a fucking fraud. If these peasants that I'm hacking could steal all my money, and get away with it 100%, would they? OF COURSE THEY WOULD. EVERYONE IN THIS WORLD OUT FOR THEMSELVES. I'm the least fraudulent person on the internet and probably in the world.

I'm here to pass time and help people, right now. Troll4troll though if you continue. I guarantee you I will win.

The point is that you are, besides being very sketchy.. You are freaking out on members that are 'l33t' for asking questions.

Anger issues isn't a great thing to have. I would work on that before sharing some other bullsh*t story.

Fail troll. Cba to respond. You're not winding me up.

Lighten up guys, if you were anything like a normal person that wears a black hat, you would just perhaps smile at this thread? A little smile? Maybe? No need to get sour over me doing better things than you. Go back to Minecraft.

You're very welcome!

MightyOne - June 4, 2020, 3:45 am

thank you its banned. what ever that was.

I really dont understand the point some people take the time to make an account, just to troll for 10minutes here and get banned?

What do you earn by that besides waisting your own time? its ridiculous i swear to god

I don't care, the multi-account boy got closed and that's the only thing I care about.

I guess you are literally only seeing the posts of me arguing with 'new' members though, the rest of my posts are often kind ?

Also.. as I said here;

Who the fuck saves their bank details in a file on their computer. That is so dumb

shakur123 - June 5, 2020, 5:40 am

Am i the only one who writes down this kind of info in a special notebook and place it in a safe?
