Thread: [\[GIVEAWAY\] Bustabit Scripts \[LEAK\]](#)

JakartaMan - June 4, 2020, 5:49 am

Hey guys and gals!

So I have been banned for a week or so, due to one member thinking I was selling leaked scripts in a bundle.

To reiterate, I was selling MY OWN script, with free addition of extra scripts.

Furthermore, only one (Bustabit Buster) was actually leaked of these scripts, the rest I traded from another seller via another forum, so they were not leaked beforehand. But the user could not be reasoned with, so here we are.

However to alleviate the problems this might cause, I now have included them in a separate package / leak.

Therefore I give you, separately, all the extra scripts that were included in my package.

You can reach them on the link below as well, if you don't want to buy my script. They will not be part of my package anymore. The price remains the same, as they were included as a free extra.

Since then I added another one you could find for free, that is included here as well.

Thank you for your attention, leave a rep if appreciate this!

Depends on the script, I think with an average of 100\$ you should be ok, but please note these do not have stuff that my script has, and it is gambling so you might lose your money.
