Thread: [I got the Lottery award with a 0 Byte and 0 participants Lottery refund.](#)

Exalted - June 5, 2020, 12:56 am

So I just viewed my profile, where I noticed I have the Lottery award, for which I surely am happy, but I cannot see it in a thread view. I know I've received the award due to a bug because I received a lottery refund for my 0 Bytes lottery with no participants at the exact time of the award. I would love to keep it if possible.

Thank you!

I just created a lottery with no starting price, and nobody joined it, I think that messed something up.

Yes, and yes. I saw a thread mentioning someone else had made a 0 Byte lottery, but people joined, nobody joined mine, which is the problem, I think.

Bastille - June 5, 2020, 3:37 am

What the heck, almost 7 000 spins, lost 5400 bytes last night, and you got the award for almost nothing ?

HF ?

Congrats though

Kindly let me know if you've got plans on doing some more lotteries but of course there should be anything there to win lol

This has nothing to do with spins, and I'm sorry for your huge loss.

Thanks though!

By the way why don't you have that ruby egg on the incubator, raised it up and have it on the battle.

Oh. Okay ?

Astrogen - June 5, 2020, 4:07 am

Try doing CTRL + F5, that's a ruby egg from what I see here.

The ruby egg I got after I made this thread ?

You can see the Lottery award on my profile.

Oh, I see, that must be a bug since there's no lottery award afaik.

Thought it was the egg since a similar incident also happened when an expired egg on lottery became a diamond similar to yours when egg lottery was first released.

Hmm, I think I got it wrong, it is not a lottery award, but I got award_0 (diamond?) with/for my lottery while it had 0 Bytes reward and 0 participants. Lol.

CTRL + F5 your HF page and see if the Diamond you have reverts back to normal, it should.

If not, go to this page below and do the same thing, CTRL + F5 to refresh the award sprites page.

The Diamond that's showing for you is in fact a Ruby egg you won from a post.

Thank you for the CTRL+F5 advice, but the award is there. Others see it too. On my profile click on the awards button and see for yourself.

Oh damn you're right, didn't even notice that the award wasn't labeled on your myawards.php page.

Never seen this happen before, especially with the Diamond like that.
Must have something to do with a minor glitch in the lottery system I'd assume. Curious to see what Xero or Omni says about it.

flavoral - June 5, 2020, 5:43 am

Looping [Xerotic](#) to see it when he wake up

Testing it to see if it is able to be replicated or not. It will also confirm a fix if one is made shortly.

Wait so are you waiting to see if someone will buy a ticket for 100k Bytes?

edit: What I should say is how are you going to test it when the entry is so damn expensive lol?

He's trying to replicate what happened by creating a lottery with 0 bytes in reward and no participants.

Ohh I gotcha now, that makes sense.

I knew the 100k entry fee had to serve a certain point lol.

Exalted - June 6, 2020, 6:50 am

I just got a PM and replied to it, and I just noticed that the diamond (lottery) award does show up there ?

Well, bug confirmed! Congratulations on your award though!

Cooligan - June 6, 2020, 12:44 pm

Damn! Turns out that it does in fact grant you the Diamond award with the description of "- Lottery", however remains unnamed in his actual [award list](#).

iNviZ - June 6, 2020, 11:34 pm

You found a glitch. Web tested it (confirmed), it's the weekend though.

Maybe some type of lottery award is near?

Imagine getting an award for gaining 25k bytes off a scratcher? Maybe that sexy trophy with the red jewels?

Grizzly - June 7, 2020, 3:40 am

it has been removed? if its a glitch ? yet?

We'll see, I think we can expect a staff reply probably by tomorrow.

Funny that flavoral has made two very expensive lotteries ?

Yeah, all depends on their schedule I'd assume.

Also uhh, that's uh, odd to say the least lol. When did you notice them?

[flavora](#) What are you doing lol
