Thread: [\[Free Help/FUD Crypts\] I'm a ratter skid, here's my setup/tools.](#)

Crypto God - June 6, 2020, 7:17 am

prnt.sc/suxahg there's some of the tools I use to HACK BITCHES!

I use vSupreme Crypter v0.2 to convert my Async server to a js file. Then I obfuscate the js file with a private js obfuscator I pay \$80/m for. This produces a FUD output.

I can give you guys access to my crypter if you want. I know many of you will appreciate the long FUD time. It's quite a popular js obfuscator but I have enterprise features etc.

Anyway, I use Async to hold the bots. But I'm thinking of switching to Orcus to manage high quality tier 1 bots and leave Async as the loader. It's great how you can upload via memory with Async and bypass AV.

I use namecheap for my DNS \$2/year and it stays up nicely.

I use nVPN or DollarVPN for my VPN (both have port forwarding features)

I use .lnk (shortcut) exploits (disguised as a picture, or a .txt file, you can change the icon) check out LNK kisser if you want to try spreading with .lnk files. It bypasses WD.

I've ratted 700 computers in the last week or so. Very low quality poor people though. Sadly.

Just sharing this to see if I get any interesting replies.

I'm really looking for a ratting group of friends to keep me motivated and learn from/make money with.

If you need any help let me know. I'm here. ?

Professional - June 6, 2020, 11:47 pm

Do you use free .lnk exploit or paid one?

cause as far as my knowledge, almost all free .lnk exploits are heavily detected by almost all AVs

bluud - June 6, 2020, 11:49 pm

All your shit is free, for example:

EDIT:

(REMOVING LINK INCASE IT'S A VIRUS.)

Nyan_x_cat on yt is who I'm referring to.

When I do I just use LNK kisser because it bypasses WD. But yeah, they are all detected af. LNK kisser bypass WD nicely though. ?

with the latest update of WD, I doubt it would be bypassing it.

What's the latest update? I only tested LNK kisser couple days ago. Bypassed. It's been around for about a year too.

windows 10 2004 is the latest update, it has new version of WD.

It's really very strong, worth giving a try.

How gay I will give it a test now.

<https://prnt.sc/svasc6> WTF? My internet is on tho? :S

Bypasses still. Smartscreen thing is weird though.
