What is this?

This is a bot I have coded in Python and C# to allow you to boost your listings. You put in your listing and it will auto-resolve it within the software and point out a name. Afterwards you can begin boosting and it will send views to your listing to increase its position in the rankings!

LIFETIME LICENSE => \$19.99 => \$13.99

FAQSpoiler ([Click to View](#))

Q) Will I get banned?

A) I have never ever experienced a FULL ban on an account. Although "Ghost" bans on listings are common if your account is new and the listing is new. Please ask for advice if you aren't sure.

Q) How does this affect my listing?

A) It will increase the ranking of your listing. Although Watchers and Sales will increase it more.

Q) Can I use this on my Mac/Windows/Linux OS?

A) Yes you can, I have written two versions of the bot to allow diversity.

Q) Do I need a Proxy?

A) Nope, completely proxy-less. I would recommend opening up a free VPN before hand if you are worried though ?

Q) Will this work on my Virtual Machine?

A) Yes. Although this isn't a guarantee. I have had several people report working and one who couldn't get it working on a VM.

TOSSpoiler ([Click to View](#))

1) If the program breaks due to an Ebay update it is at my own discretion to update it. (Updates are free.).

2) ANY ATTEMPT CRACKING OR BREAKING THE PROGRAM WILL RESULT IN YOUR LICENSE BEING REVOKED.

3) SHARING THE PROGRAM WILL RESULT IN THE PROGRAM BEING REVOKED.

4) LISTING RANKINGS AREN'T GUARANTEED, IT IS UNLIKELY YOU WON'T MOVE AT ALL BUT WATCHERS/SALES INFLUENCE TOO.

(Oct 12, 2019 07:20 AM)Xen Wrote: [\[CITE\]](#) Received a vouch copy a few days ago and I have to say it's fast, easy to use and overall it does exactly what it says on the tin.

The support from Joel is great and he is happy to give a run down on how to use it effectively. Give it a try, it definitely helps if you're into drop shipping on eBay.

Also - It's only, \$14.99.

(A contract was used to purchase, not sure why it's not showing it above this post)

I'm interested, what's the chance of your eBay account being banned or your listing removed from using this? Is there safe settings you recommend?

I'm curious about this aswell.

I haven't experienced a full ban ever. But when I created a new account and starting sending loads of views 3k+ to one listing it got "Ghost-banned". Basically they remove it altogether from your profile and listings for a temporary amount of time (usually 24 hours).

So personally per NEW listing I'd aim to do 1-3k at most a day. Once it has sales/watchers and organic views coming in you can increase that amount. I really hope that helps you and answers your questions. If you have anything else to ask, ask away.

Answered the question for both of you. I hope it provides some insight. Even if you don't purchase you'll have some sort of guidelines now :)

VERY interested in this for my dad's business.

We already get a ton of views but if I used this to add like 200-300 added views on a few products, a few times a week, do you think it'll mess with the account?

It's a very aged account and has been used pretty much 100% clean since we first made the account in 015.

It definitely won't. Your account is actually prime for it. Whenever I used to not sell the software just the views I had a fella helping out his Dad as well. He ordered £100 worth of views spread out across all of his listings.

It really really helps :)

Edit: I'll also give you a usage guide to make sure you know what not and what to do.

Sounds interesting, but I have a question - How can a brand new seller with new listing use this with

safety?

I know brand new accounts with new product may get suspended if lots of fake views are spotted by ebay.

Suggestion please....

Don't do over 1500 Views on a new listing.

Are all the views sent from the user's IP?

Yes but its not important. If you're really safe you can run a free VPN before you run the program.

Alright.

I don't know much about how eBay analyses and detects views, but from the looks of it, it seems that eBay doesn't care whether the views come from the same IP or different ones.

Yeah?

Can I use multiple proxies to deliver unique views? Or it has built-in feature to do that?

Completely un-necessary with Ebay.

Edit: I'm working on an Ebay Panel that will allow you to launch the views online so you don't need to download anything. Proxies will automatically be included.

In full 100% honesty its too hard for me. I will get better and complete it but I'm just not skilled enough yet to make it.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
