Thread: [\[HIGHLY PROFITABLE\] Shopify Niche Store](#)

So I am selling a Shopify dropshipping store that is a niche store for the Netherlands.

It is fully in Dutch and these are 2 products that aren't available in a store or for that price. So if you know how to use FB Ads and Google Ads, it would be easy.

The reason why I am selling is because I finally received my products from my own brand, the store was made because it was delayed.

Interested in the store or want to see it, start a chat!?
