Huge e-mail list of 850.000 e-mails, great for a e-mail marketing campaign for your business.
The e-mails were acquired in the period of 2018-2020 and they are fresh.
The specific niche of this list is gaming (World Of Warcraft).

There is no additional fees or charges, list orders are a one time purchase and you own the list. All taxes and fees are included.

This is a highly targeted database that will provide results for anyone looking to promote products or services into the gaming market.

I personally had decent conversion rates with this exact list.

This is big so, please, contact me only if you have larger budget.

The list was cleaned multiple times, the least active mails were removed. Although this list contains only a small procentage of older mails (9%), I thought it was worth mentioning it.
