Thread: [\[php\] delete row with a <button>](#)

blackcoder00 - June 8, 2020, 9:28 am

guys im wonder how can i create some button that delete data from a table i didn't find how could i do it so i have replaced the button with <a> tag ==><a href="edit.php?id= . \$\$row["name"] for the where condition delete from list where id = '\$_GET['name']'

index.php file

PHP Code

```
<?php
$conn = mysqli_connect($servername, $username, $password, $dbname);
// Check connection
if (!$conn) {
    die("Connection failed: " . mysqli_connect_error());
}

$sql = "DELETE FROM list where name = '$id'";

if (mysqli_query($conn, $sql)) {

    echo "succes delete you can back <a href='index.php' back </a>";

} else {
    echo "_error_: " . $sql . "<br>" . mysqli_error($conn);
}
```

updatetable.php file

PHP Code

```
<?php
while($row = mysqli_fetch_assoc($result)) {
    echo "<tr><td>".<a href='php/updatetable.php?id=' . $row["name"]. " </a></td><td> " . $row["description"]. "</td><td> " . $row["matiere"]. "</td><td>". $row["date"]. "</td><td>". $row["jour"]. "</td><td>". $row["time"]. "</td></tr></form>";
}
} else {
    echo "0 results";
}
echo"</tbody></table></div>";

?>
```

HFDone - June 8, 2020, 11:47 am

delete the row in the db and load the table again

blackcoder00 - June 8, 2020, 12:07 pm

i want to create a button to select a specific item to delete it in the table

HFDone - June 8, 2020, 1:20 pm

so add button and onclick put the code to delete it and load the table again

blackcoder00 - June 8, 2020, 2:33 pm

(Jun 8, 2020 01:20 PM)HFDone Wrote: [\[CITE\]](#) so add button and onclick put the code to delete it and load the table again

can you show me some example please

HFDone - June 9, 2020, 4:03 am

search for html table delete row by id

dude i want to create a button that delete a specific row from database like the example in the picture

Squito - June 9, 2020, 8:16 am

And I provided a solution, that you have to change slightly to work the way you want it. If I do it all for you, you are going to miss the 'figuring out' part of the process, which is eventually a bad thing.

thank you alot dude i will try it <3

Backbone - June 9, 2020, 7:39 pm

I do it like this.

On table:

Code - loop on result

- get the row id

- placed the row id on a href link of delete button

Example: `<a href="?action=delete&id=ROW_ID">Delete</a>`

On back-end code:

Code - Check for the action and id query param

- Do the delete query using the id query param
