Thread: [\[FREE\] DarkIRC autoit botnet \[SMB/VNC/MSSQL SELFREP\]](#)

Freak_OG - June 9, 2020, 9:07 am

Hello everyone. Today I am releasing my main botnet for the reaking of havoc on the planet.

The features are:

bot nickname format: priviledge[WINVERSION|x86/x64|cpucore]BOTID

commands:

Code !* syn ip port time - SYN connect flood

!* condis ip port time - Rapid connect/disconnect flood

!* tcp ip port time - TCP flood

!* http ip port path time - HTTP flood

!* arme ip port path time - Apache remote memory exhaustion flood

!* rdp - rdp data stealer

!* noip - noip stealer

!* filezilla - filezilla stealer

!* silentinstall msiurl - Silent MSI installer

!* dlexe exeurl - Download and execute

!* usb - USB .lnk infector

!* sendmail - Outlook massmailer

you can also call a portion of you net with !a* [command] or !*x [command]

Enjoy. ???

This botnet also include selfrep through SMB, VNC, and MSSQL. Simply change the \$dlexe to your hex encoded download and execute command. +rep me if you like this botnet I coded.

Hmm this looks interesting, I'll take a look at this in more detail when I get some time.

Thanks for sharing!
