What do you mean?

LUD3N - October 17, 2020, 3:04 pm

(Oct 17, 2020 02:53 PM)tsuki Wrote: [\[CITE\]](#) Almost all of the tools are pragmatically useless, terribly coded, and will promote a bad mindset and bad habits for beginners who will just run them without knowing why or whether they're even useful or not. They aren't.

The cart becomes before the horse. You should be learning programming and computer science, not bruteforcing and port scanning random networks or trying XSS stuff when you don't even know JavaScript.

Learn math, programming, linguistics, whatever, and then make your own unique, creative stuff. Just don't waste your time with these tools because I can promise you that you won't get anywhere, and you'll just be wasting your time.
Alright man thank you for the advice.
