Okay so i received a vouch copy last night, and i have had a thorough look through today.

First of all i want to say that rocket league is my favourite game, so being able to make money whilst playing a game i love is great.

So going through all the steps that are explained in this ebook , you are definitely going to be able to make money whilst you are playing. Gamer does include a way to make money a little quicker which requires a little investment (But this is not needed, only an option to speed the process up if new to rocket league basically). The ebook consisted of 11 pages which include a lot of detail and in-depth steps that anyone can follow with ease. The ebook also comes with two extra pdf files which contain more information to complement the guide.

I will be using this method to make money from now on as i really had not thought of a way i could be making money with a game i love, but thanks to this ebook, it has made it possible for me to start making money with little effort.

But just like anything in the real world, money is not just handed to you, you will need to put minimal effort into this, but it is very minimal.

Anyway I would 100% Recommend you to purchase this Ebook if you are looking for a fun way to make money

This method is extremely simple and can be done by anyone if I'm honest.

It also isn't a hard method to do however the returns will vary depending on the amount of effort put in.

Through reading through the method I can honestly tell you this is a sure way to earn money while also playing a game you enjoy

2/2 copies have been given out, however, if a very reputable user asks for another copy, I'll give one more out.

Sent you both a copy,

I have spent probably 10k\$ on items in the game. If you're interested in a review slide me a copy and I'll deliver a nice well written review. If not, that's fine.

Have a good day

Would this work for the PS4 version?

Sent you a PM with the answer, however, for others with the same question:

YES - This will work regardless of you playing on PC, PS or Xbox, the difference is. You won't be able to use my "Trade examples" as they're made with PC values in mind, I do however explain (in details) how you can research values yourself, so it shouldn't be much of a hassle.

Hey dude, do we have to purchase a pass or play a lot to achieve some income? I suppose we will be reselling the digital goods (items in-game) and I wonder which payment options do sites you are going to recommend accept?

Hello - A pass is not necessary, however, it could boost the income exponentially as you'll be getting a lot more items just from playing. Yes, you will be trading your in-game items, and then selling them once you've made a solid inventory.

One of the sites offer Skrill/Moneybrookers and Payoneer, another offers Skrill/Moneybrooker, Payoneer and TransferWise.

You won't be buying items directly, and then selling them, as I believe the potential is very vague - You'll be trading your way to profit, then sell.
