Thread: [=====> UNLIMITED GOOGLE DRIVE with OWN EMAIL \[METHOD\]](#)

Krysis - June 10, 2020, 12:34 am

Unlimited Google Drive

Ever paid Google for storage? I did once upon a time. But not anymore!

Summary

I'm going to show you step by step, how you are able to get Unlimited Google Drive storage. This is a well-written eBook with 4 pages of easily repeatable steps, to get unlimited Google Drive Storage. The method can be repeated over and over again, as long as you got the requirements as stated below. You will be able to resell this storage to others if you choose to. Or maybe you just want unlimited storage yourself? That's entirely up to you.

What does this require?

A PC or a Phone, An Internet Connection, A Google Drive account, and a brain. It does NOT require anything special such as a .EDU email or anything like that. Just a simple Google E-mail Address will do the job.

How much is it?

I am offering you this well-written eBook for only \$4.99.

How to buy?

1. Click `[contract=tid]Start Contract[/contract]`
2. Copy & Paste this Threads URL to the 'Thread Link' text box on the Contract page.
3. Set 'Your Position' as 'Buyer'
4. When you meet a payment page, simply write that you will pay with either Bitcoin or PayPal. The price is always \$4.99.
5. Simply finish off the Contract. I am always on, so expect almost no waiting time, unless I am sleeping. If that's the case; expect a waiting time for up to 8 hours.

Vouch Copies are given out as usual. Only a few in exchange for an HQ review. Simply follow the 'How to buy' but instead of setting 'Your Position' as 'Buyer', set it as 'Vouch Copy'. By creating such contract you accept, that you will write a HQ review regarding this method.

I got the vouch copy from OP!

I get within a minutes a shared drive

The eBook is 4 page with nice presentation and it is definitely worth for money

If you are selling a service where you are telling people to buy something from you again this is simply not allowed. This is a public as hell method.

Why the hell are you selling a method where you get people to join a shared teams drive?
