Can't go wrong with some stars on your ceiling...

<https://www.amazon.com/BlissLights-Sky-Lite-Projector-Ambiance/dp/B084DCF429>

Got this about a month ago, girlfriend loves it more than I do, but I will admit its pretty cool.

Does it really light up the room the same way it does in the photos? Do you have any pics of yours?

It does indeed my friend, at night, this thing hits different... As far as pictures, I'm not home, but I promise if you just google/youtube reviews you'll find what you're looking for! It is really bright and does look great at night especially.

You should buy those toothbrushes that have a timer and you know when to stop cleaning them. 2 mins every day and you should have a shiny new smile soon.

Another cool thing that I managed to snag on amazon is a portable shower speaker:

It attaches to the wall in your shower/bathroom and or bathtub and can play music from your phone bluetooth.

Are you a fan of having more than 1 monitor? I recently bought a second one from Amazon and it improved my productivity a lot =>

The usual: SSD, bluetooth speaker, raspberry Pi, dashcam if you have car etc. are good options too. Plenty of good stuff on Amazon.
