Block file removal with a simple trick

How it works?

Use "CreateFile" to get handle from file path

Look for processes where to "inject" the handle

Use "DuplicateHandle" to duplicate the original handle in the selected process

Close the original handle

You can check out the code in my blog post [here!](#)

Or directly on [Gist!](#)

Regards,
Paskowsky

Another interesting release, great job paskowsky!!

SaketSaket - June 11, 2020, 1:16 pm

Nice work... Keep posting... keep rocking...

7 - June 11, 2020, 1:18 pm

Yet another layer of simple persistence. Thanks OP

FrenchTech - June 11, 2020, 4:15 pm

Interesting code! Thanks for sharing.

VisualSoft - June 12, 2020, 3:35 am

Interesting release, Keep up the good work.

Klonopin - July 27, 2020, 9:47 pm

Great share OP!

interesting post, keep up with the grind

tux1 - July 29, 2020, 1:56 pm

Interesting trick, thanks for sharing!

Scapula™ - *July 29, 2020, 9:25 pm*

Nice trick, thanks for sharing.

Freak_OG - *July 30, 2020, 12:37 am*

this is great! Wow such rootkit many haxes, wow, thanks bro!

Exalted - *July 30, 2020, 12:38 am*

Interesting, thanks for sharing this OP. Keep them coming!
