Thread: [Dank HF user scripts](#)

**Crash™** - June 11, 2020, 4:39 am

Im looking for those dank HF user scripts...

Had a nice dark mode one, one to remove signatures and header/footer info and one to notify me of pinned posts.

Share that gold and spread the love with your cool scripts.

PS: I might have lost my user-scripts and am unable to locate those previous sources so Im trying to get that sauce.

Thanks...

**bluud** - June 11, 2020, 4:48 am

Removing signatures is kinda rude :(

Its a local edit, some users might access HF from a place where they dont need a shoulder surfer to see blatant adverts for rats and e whoring methods in a user sig.

**bluud** - June 11, 2020, 4:53 am

I'm aware it's a local edit. You have a fair point.

I'm pretty sure tampermonkey has a search function. Would recommend just searching HackForums/HF there and see what you find!

**Crash™** - June 11, 2020, 4:55 am

Tried, found a few of outdated scripts on HF and nothing on greaseyfork.

Hence my reaching for the community to spread the lovely scripture

Sounds good, if you could quote me in the case that anyone shares some I'd appreciate it.

Interested to see some scripts that could make the site more visually appealing or add unique features.

**shakur123** - June 11, 2020, 6:11 am

Im also interested on this, it would be nice to know whats scripts are out there and if it makes the HF experience better

**Goku** - June 11, 2020, 6:22 am

[Xerotic](#) used to make userscripts for HF

This section contains userscripts

<https://hackforums.net/forumdisplay.php?fid=247&sortby=lastpost&order=desc&datecut=9999&prefix=138>

Making them yourself shouldn't be that hard.

But I would start by learning HTML, CSS, and Javascript.

**Bacardi Cola Lime** - June 11, 2020, 6:40 am

Only user script I've ever used is the one that counted how many letters I've written in my posts so I know if it was eligible for any of the gift box awards. I don't know if something like this would come in handy today.

**Crash™** - June 11, 2020, 7:04 am

Thank you for this! Found a lot of interesting ones I will be installing.

Quickloved.

Thanks! And of course, np. I myself was hunting for those couple years ago haha

**Lynx** - June 11, 2020, 7:53 am

I made one for the HF chatroom.

<https://hackforums.net/showthread.php?tid=6007829>

I have no idea if it still works though.

**Xerotic** - June 11, 2020, 9:24 am

Settings for almost all of those exist.

<https://hackforums.net/usercp.php?action=options>

Click the eye by the logo to hide it.

**Nate** - June 11, 2020, 11:31 am

Theres a big thread I think by xerotic for HF scripts for all the scripts he created.

**Exalted** - June 12, 2020, 1:51 am

Yesterday I published a small [userscript](#) that adds two search buttons on the Post Activity page. It's nothing big, but it does enhance the user experience if you ask me.

here you og!

PHP Code

```
<?php
// ==UserScript==
// @name      Cryptic's Lucky Award Counter
// @namespace  Cryptic
// @description Make's sure your post is eligible for the Lucky Award
// @require    http://ajax.googleapis.com/ajax/libs/jquery/1.8.2/jquery.min.js
// @include    *hackforums.net/*
// @version    2.3.1
// ==/UserScript==

var url = window.location.href;
if (url.search("showthread.php") > 0) {
    regex = /here.*?>/;
    revised = "here.<br /> <div id='letscount'>0<br /><span style='color:red'>Too Low!</span></div>";
    document.getElementById('quickreply_e').innerHTML= document.getElementById('quickreply_e').
innerHTML.replace(regex,revised);
}else if (url.search("newreply") > 0) {
    $('strong:contains("Post Options:")').append("<div id='letscount'>0<br /><span style='color:red'>Too
Low!</span></div>");
}

addButtonListener();
function addButtonListener(){
    var url = window.location.href;
    var texts = document.getElementById("message_new");
    if (url.search("showthread.php") > 0) {
        texts = document.getElementById("message");
    }
    texts.addEventListener('keyup',doCountNow,true);
    texts.addEventListener('keydown',doCountNow,true);
}
```

```

doCountNow();
function doCountNow(){
    var url = window.location.href;
    var field = 0;

    var text = document.getElementById("message_new");
    if (url.search("showthread.php") > 0) {
        text = document.getElementById("message");
    }

    text = text.value;
    text = text.replace(/\[V?quote.*\[^\]]*\]/g, "");
    text = text.replace(/\[img\].*\[Vimg\]/g, "");
    text = text.replace(/:([^\:]*:)?/g, "");
    text = text.replace(/ /g, "");

    field = text.length;

    var minlimit = 100;
    var maxlimit = 18000;
    if (field < minlimit) {
        document.getElementById('letscount').innerHTML = field+'<br /><span style="color:red">Too Low!</span>';
    }
    else if (field > maxlimit) {
        document.getElementById('letscount').innerHTML = field+'<br /><span style="color:red">Too High!</span>';
    }
    else {
        document.getElementById('letscount').innerHTML = field+'<br /><span style="color:green">Okay To Post!</span>';
    }
}

```

Just copy this into the dashboard as a new script

 Didn't know these were a thing. Appreciate it brotha!

**Wespa** - June 14, 2020, 7:11 am

I never even knew that there were user scripts on this forum.  
 Thanks for the heads up.

**Simplex** - June 14, 2020, 8:01 am

There is a nice one that removes the word filter.
