Thread: [Is anonymity by anonsurf and macchanger enough for a hacker to remain anonymous?](#)

The A.R.B. - June 11, 2020, 11:52 am

I am using anonsurf and macchanger.

Is anonsurf enough to keep me anonymous while hacking?

DyMa - June 11, 2020, 4:33 pm

If anonsurf is just a proxy chain then no

Every time you visit a website they can see your resolution, user-agent, installed fonts, graphics adapter etc

The A.R.B. - June 12, 2020, 9:08 am

Anonsurf is a software which connect the whole system to tor network.

Now can i be traced through the tor network? i am using anonsurf, macchanger and of course a virtual machine.

What do you think? how hard it would be to trace me back?
