Hello HF...

I am launching a anime streaming site which features a lot of exclusives in HD.
I am looking for a few beta testers to private test it. If you are anime fan, it will be win-win.

PM me with your Discord id if you are interested.

I don't personally watch anime although I have friends who do. Will be messaging you my discord ID and will have them let me know what they think!

Sent you a message! Anime/manga fan here. I would certainly appreciate a good streaming website and could provide you with useful feedback.
