Thread: [Pokemon battles 3ds/Switch](#)

Haseo™ - June 13, 2020, 9:22 am

Have had some spare time recently so decided to start recording some of the games I randomly play throughout the day/week. Mainly pokemon Ultra Sun and Sword version but It's a fun little project but I'm realizing I'm going to need better video editing software as I'm quite limited with lightworks. So please checkout tbe video and if you have any suggestions for editors please let me know below!

Music is fire. Need to work on edits. Cut the video to action moments.

Thanks!

It's been a minute since I've posted this one and have had time to play around with a few editors. Getting better but now stumped on what to make. I play a lot of final fantasy xiv but already 2 amazing content creators.
