Thread: [RAT with onconnect upload and run / download option](#)

XMRFISHY - June 14, 2020, 2:41 am

I'm searching for a RAT with the options to upload a file and download on connect

Can someone suggest me which one to take?

look into async Rat, it has something similar to it.

XMRFISHY - June 14, 2020, 3:19 am

Async rat doesn't have search and download file on connect

7 - June 14, 2020, 3:23 am

There are quite a few rats that's run commands on connection from what I remember warzone does does. Personally I would build a downloaded/loader manually and have automated tasks done that way

you want to download file from Bot PC?
of you want to run a file on Bot PC?

XMRFISHY - June 14, 2020, 3:29 am

I need a RAT with the function to on connect do:

Upload to bot pc and run file
Search for file, if found download from file/files bot pc

From what I remember LuminosityLink had this options, is this RAT still available maybe cracked one?

Upload to bot pc and run file is available in async : <https://prnt.sc/szfsly>
Search for file, if found download from file/files bot pc : No but you can easily add to it as its opensource, if you dont know programing then hire an coder to do it.

Warzone RAT has this exact feature, however it lacks in other areas.
