Here's how you get 70% discount on larger orders:

Place multiple pickup orders, as Uber Eats doesn't charge a service fee. You can use multiple coupons and pick all of the order at once.

Obviously, you'd have to purchase some of these promos first! ;)

Just one per order.

You can place multiple orders though, pickup orders are the easiest. Place multiple \$20 orders and get all your food at 70% off.

\$10 referrals are \$4 each.

People have \$5,10,20 randomly in their Uber Eats app. You'll need to find an account (friends, family) with \$20 in the invite and earn section if you want \$20 referrals.

Hey, Uber has been randomly reducing referral amount for people, doesn't have anything to do with me or my service.

At times, it gets reduced right after login. Anyway, I do have a method to get it back if you're interested in trying.

1. No, you can't stack them.
2. Yes, the promo takes care of that.

Promo downgraded from \$20?

We now also offer preloaded accounts with promos!

You can order a minimum of 20 promos and get a disposable account filled with them.

Stanley - August 12, 2020, 11:58 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

I'm interested to know if your service works for UberEATS in the UK?

What would the pricing be and is it possible to pay after service is successful? I had an issue with another seller where the referral didn't apply and they wouldn't refund because they did what they had to on their end.

I look forward to hearing back, thanks.

Kind regards,
