Thread: [Freddy's Webdev Services \[Laravel, Custom APIs, MySQL, MongoDB, bootstrap, VueJS\]](#)

**Freddy Kru?ger** - June 16, 2020, 7:30 am

Welcome to Freddy's Webdev Services

Backend development: Our team is capable of handling small scale applications to large scale such as E-Commerce development from scratch, internal management software such as School Management, CRM for Corporate with various Logins. We are also capable of making our own API from scratch with security measures taken in consideration. Our team can handle database technologies such MySQL, MongoDB, and can also work with AWS for server management.

Frontend development: With the help of API our Frontend work becomes easier and very easy to manage. Our team is capable of using HTML, Bootstrap CSS, and VUEJS to make the frontend app responsive, asynchronous and also scalable, we can also use VUEJS to make SPAs or PWA apps.

Previous work if asked: I can show my code through screenshots. Screenshots of existing projects i worked on and current projects.

Proper thread design is coming soon.

I accept payments in BTC only, please contact me via Discord for more information. Griffith#5914

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley
