Should've bought permanent upgrades then. Stop whining.

You didn't really answer my question but I assume it says you gotta be first l33t to upgrade to uber as an error or something. Also, don't flame members.

No, you need to purchase the permanent L33t upgrade if you want to be able to re-upgrade to Ub3r once the annual subscription runs out.

It's only a \$10 difference and will obviously save you money in the long run, especially seeing you've upgraded to V3ndor.
