Thread: [Recently Jailbroke, Safe Repos?](#)

Untold - June 19, 2020, 9:57 pm

Recently jailbroke for the heck of it for the first time in a while, just curious as to what repos are safe from malware and other malicious things.

I recently downloaded two tweaks off of [repo.hackyouriphone.org](#), I downloaded Dayn and Jellyfish. Just wondering if anyone has had any issues with these tweaks or the repo in general recently. Google is misleading as usual. Considering actually just paying for the tweaks since they're cheap but I'm lazy.

Hack your iPhone repository is piracy repo so security is not possible and most of the tweaks don't work or either very old

<https://repo.packix.com/> - far best paid repo

I have a list import these
