Thread: [PSA - CypherIT Exit Scam \(Fake FBI Seized Site Notice\)](#)

Demoralise - June 19, 2020, 11:27 pm

As you can see if you go to the site it is apparently seized:

<http://cypherit.org>

- Yet it redirects to a JPEG image (bizarre, the FBI would not need to use a JPEG image. They would set the seized size notice as part of the main page design.)
- The image doesn't even fit the entire screen. Not to mention the developer is French and there is no mention of the French police - which would be required under legal jurisdiction. It would be highly unusual for an international authority to shut down the site
- The notice states that it is for the "District of Oregon" - wtf does Oregon have to do with CypherIT? Nothing. If this site was truly seized by the FBI it would not mention the district of Oregon
- The rest of the website appears to be operating normally which is not what you would expect from a site that is shut down

I am almost 100% certain that this is an exit scam

Lor?d - June 19, 2020, 11:34 pm

Not 100% sure here but I think when the FBI seizes a website they redirect the domain. This domain is still pointing to cloudflare.

VisualSoft - June 20, 2020, 12:14 am

Yap, you guys are correct.

Its looks Fake.

doomkit - June 24, 2020, 8:27 am

Well if you rename seized.jpg with anything

Example <http://cypherit.org/login>

You can still see they costume 404 page.
