This Account was created by me and it is 100% safe to use.
Even if something would happen, which chances are very low (below 0,1%), I will always be there to support you with a refund or a new account.
You will 100% own the Account after the purchase, thats what I will make sure.
If you have any questions, feel free to contact me via the integrated message tool.

I also offer a GTA 5 Online Modding Service, which prices are the best in the market! Just message me and we will talk about the price and other details.

Account costs 35€ in Bitcoin or Ethereum (you pay the bitcoin fees, that means I will then receive 35€ in BTC and not like 33€)

I do agree to a middleman! ?
