FAQs

Q. How much should I realistically expect to make from this ebook?

This method will take you time to setup, and yes, this method at its infant stage will not net you $150 daily. But once the method has been understood and you're done with preliminary setups, it is very realistic of you to expect $150 or more daily.

Q. Why are you selling this if you're making so much off it?

Because of two things, it cannot be saturated because of this day and age of digitization. It requires a fair bit of work daily if you're looking to make $150+ a day, work which isn't related to my area of expertise, and hence it makes sense for me to actually sell this method than always use it.

Q. Is this illegal/blackhat or in any way or form illicit?

No, it is legal completely and does not require any form of hacking/exploits or anything remotely illegal.

Q. Any investments required?

No, but it doesn't hurt to make an investment of $30 - $50 for the 2nd approach mentioned in the e-book. If you follow the steps and your own spin to it, you can definitely make your money back and more in the long term.

Q. What is the payout method?

Paypal and Bank Transfer, depending on the method you follow. Local currency and cash too is possible, depending on your approach.

This is not a pyramid scheme method telling you that you'll make bank daily, but I can promise you that with the daily amount of work put in and your talking skills, you may be able to make a fair bit of side money.

I read the method, and this is something I am familiar with and something that has existed for quite sometime. Without revealing too much the method revolves around arbitrage. Can you make $50 - $150 a day with this? You can do that and much more. The OP does give a very detailed step by step on how this can be achieved, however like everything, adding your own twists will greatly help with earnings. I want to be clear and say that you can earn with this method, but you need to work. Practice make perfect, the more you apply it the better you will become and the more money you will make. Dont expect to get rich overnight or make $500 on your very first day. If you follow the method and you apply your twists, and you stick to it, you will definitely make money.

After reading through the eBook, I can confirm that this indeed has the potential to earn you a lot of money if done right.
Like an above user said, it revolves around arbitrage; a classic but efficient way to make a profit from an initial investment.
OP includes the markets where you should be aiming to get customers, and provides all the resources needed to start executing the method.

Overall, this looks like a great money maker.

Don't hesitate to purchase this.

I wouldn't go within a mile of this, I mean, you're not even sure if it's 1 method or 2.

It's one method with 3 approaches. Pardon the semantic fallacy, I will fix it.

Edit : fixed.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
