Thread: [China might be planning EMP attack on United States](#)

Dragon_One - June 21, 2020, 9:09 am

If this happened, then say hello to world war 3.

It's all BS trust me. The US and China love each other secretly

Silkroad - June 21, 2020, 10:03 am

Never trust someone with that many tabs opened.

i laughed so hard when read this!!
And yha, this is complete bullshit im sure xD
"Planning an EMP attack' pff bitch please, just attack lololol

Big E - June 21, 2020, 10:28 am

There's more chance of China nuking the US than EMP'ing it.

That would be one hell of a pulse if it were true. I can only imagine the size of the device to create a pulse that big.

All the conspiracy theories on data theft by Chinese companies and what now they wish to wipe out all electronic devices? Considering the amount of electronics that are produced by China across the world do you actually think it would make sense for espionage or economic value?

Holy crap. No joke.

Nyx - June 21, 2020, 11:36 am

Just the name of the youtube channel alone makes me think he believes in stupid conspiracy theories.

Wespa - June 21, 2020, 1:15 pm

Nah I'd bet atleast \$50 to that this won't happen.

Wasn't it supposed to be the end of the world today also?

China needs the U.S.

If it weren't for us buying all of their chintzy and worthless crap, they would be a poor country still.

Rin™ - June 21, 2020, 8:20 pm
How can this even seem believable in any form what so ever

telly - June 21, 2020, 8:29 pm
i love that thumbnail it made me laugh so hard

Lindros - June 21, 2020, 8:30 pm
This would be a trip if it actually happened.

I highly doubt this things to happen...nuclear weapons are much more likely to use but US got more nuclear weapons against China.

Method - June 21, 2020, 11:20 pm
china always up to something, every single damn year.

Yes but this wouldn't be a war against China, pretty much nuking either one will trigger neighboring countries to attack. If you nuke China you'll have fallout in South Korea and Japan. Russia would also launch it's entire arsenal because if China is getting nuked it's likely next. Nuclear war will never happen.

That's why China are pretty much doing nothing for US then because the consequence maybe much more harsh for they were expecting.

But to be hones I am praying things would never happen...the world needs peace and healing after all the virus is still existing and isn't contained.

Hoping Trump still gets on the position :D

Peace and unity...heal the world :D

Bacardi Cola Lime - June 22, 2020, 1:20 am

Nah, if China was planning something like that, the US would know.

The thing is that lots of people actually believe these conspiracy theories, take them to heart and live with them.

MarvinMalware - June 22, 2020, 7:25 am

I don't really believe China would be so unintelligent as to do that right now. It really would mean tragedy. Let us all hope this is not true.

funtela - June 22, 2020, 7:40 am

I doubt that this would happen

Simplex - June 22, 2020, 11:44 am

I highly doubt this will happen.

Scottyj01 - June 22, 2020, 12:09 pm

They think the lockdown is a "lie", I'm not gonna hold them credible.

.TEN - June 22, 2020, 12:18 pm

This will never happen. The US would consider this a declaration of war and reply with nuclear missiles. Whilst USA might not be able to launch, one of their allies will.

Maskin - June 22, 2020, 12:24 pm

Either this happens or I chop my balls off, WHAT IS IT GONNA BE?

Artisan - June 22, 2020, 4:49 pm

I think this is just propaganda from one or both sides. They're doing inter-nation business deals so escalation seems to be out of question for now.

ronnypacker - June 24, 2020, 5:39 pm

I think you give china too much credit. They're not that advance.. ???

Beherit - June 25, 2020, 4:44 am

I think there is more at play here than meets the eye; something that isn't necessarily an 'attack'. Nonetheless, I wonder what the relations with China and the rest of the world will take.

Driz - June 25, 2020, 5:09 am

Most EMP attacks don't really work with modern machinery though. Also, I would take YouTube videos with a 10 minute Canva thumbnail with a grain of salt.

Also it doesn't make any sense for China to irk US when it has border disputes with half of its neighbors.
