Way too much contrast, blacks are blown up and can't see details any more, I like the red glows and overall idea but I think the execution need a little bit of work and tidying up.

i think the original design is way better

there's nothing wrong with it tho if it's for personal project , but why you're selling something that isn't yours originally ?

Idea: 7/10

Execution 3/10

Effort: 4/10 - I get the impression you rushed this to make a quick buck. You need to spend a lot more time on any sort of design work if you want to achieve high-quality output. Do the research, learn, and invest in yourself more.

The contrast is far too high, you took out all the details man. The glows are poorly executed and it looks really fake, you could make the lighting look a lot more real if you look at inspiration and see how they do it. The linework also isn't blending in with the piece at all. This piece of work isn't convincing.

How can you sell something that doesn't belong to you as well, all you did was take an original piece and edit it. That's not how it works.

low quality & no effort 1/10

the audacity to say this is for sale?

The design looks really rushed

I really don't get the color combo and what you're trying to achieve with that design
