I was thinking of reaching out to small local businesses to help them in their marketing processes.

Don't be afraid to cold call/email but don't jump in about you or your business or what you can offer. Just ask them questions about their business and their marketing strategy for a while.

Register it on Google, Yelp, Trip Advisor, Apple, and social platforms !

You can also use SEMrush to distribute your business to 80+ platforms, and you said marketing if it's music spam adds it to 17+ platforms.

Good luck with your ventures!
