Will purchase this but crypter is a big issue.
Crypter coders keep finding hard to bypass WD

Matiex - June 26, 2020, 1:40 pm

(Jun 26, 2020 01:33 PM)morrgan Wrote: [\[CITE\]](#) Will purchase this but crypter is a big issue.
Crypter coders keep finding hard to bypass WD
checkout marketplace section it will work with most of crypters, but make sure when the crypter
can bypass WD.

Obistone - June 26, 2020, 3:45 pm

I was given a vouch copy for this project so here's my honest review.

Password Recovery

I didn't get the opportunity to test all of the recoveries, but from what I did activate they worked great and the result was formatted in a way that was easy to read.

The Discord token grabber could use a little work as it only got 1 out of my 4 saved tokens though.

Delivery

The Discord delivery option did not work for me for some reason, but I'm sure the problem is either fixed or is going to be fixed very soon. Telegram delivery worked great.

Do keep in mind that if you even have 20 clients running the keylogger it will spam your channel and there's no way to organize all the sent messages afaik. I'm sure the other delivery methods work fine.

GUI

The builder interface is clean, although it is a massive window on lower resolution monitors.

The developer of Matiex (or at least the builder) has made it clear that English isn't their first language; there are several grammar mistakes (although they are small and everything can still be read).

The theme is easy on the eyes, and aside from the recovery tab everything is organized. The recovery tab does need a lot of work though, it's a bunch of application names that are just listed with no organization or order at all and it can be hard to find what you want.

Features

Matiex has some miscellaneous features which worked for me (including startup and several persistence features), although the UAC bypass seemed pointless and I couldn't really tell why it

exists.

The stub's logging function might end up runtime detected, considering it writes to three files in the documents folder. Also the clipboard logger will spam it's file with the same thing because it has zero checks to see if the clipboard is actually different or not.

Support

You can easily contact the developer of Matiex and they will assist you with whatever problem you're having with the keylogger. Along with that, Matiex provides a detailed e-book to help you setup and it's a must-have for beginners.

Overall:

Builder UI - 7/10

Delivery - 5/10

Persistence - 7/10

Loggers - 8/10

Usability (Ease of use) - 8/10

Password Recovery - 9/10 (Nothing is perfect)

This is just what I think of it, I'm sure many others have varying opinions on it. Please take my review with a grain of salt and form your own conclusion based on the other reviews.

Update Pushed

Discord Delivery - Fixed

Some Bugs - Fixed

Phantom Aboki - June 28, 2020, 11:30 am

I received a vouch copy and tested the software on Windows 10 x64.

The design interface is really nice, unfortunately it covers nearly the entire PC screen. You might have some trouble finding the build button below unless you auto-hide your task bar.

Password recovery is good. Recovered from;
Chrome
Mozilla Firefox
Foxmail client
Outlook client
Thunderbird
Discord token
Filezilla
Pidgin
Windows key (these were all I had in my PC)

Keylogger works fine.

SMTP, FTP and Telegram delivery works perfectly. I didnt test Discord delivery.
Downloader also dosnt work.
Hopefully the minor bugs will be fixed soon.

Overall I think I can recommend this to anyone looking for a decent keylogger to purchase.

Matiex - June 28, 2020, 11:53 am

What crypter is compactible with this file?

Matiex - July 1, 2020, 7:04 pm

(Jul 1, 2020 06:49 PM)Stellen Sie TT Wrote: [\[CITE\]](#) What crypter is compactible with this file?
Any .Net Crypter works with it, if they can bypass in runtime.

esikeso - July 2, 2020, 1:37 am

I am absolutly begginer in keylogging so i have few questions for owner..

Is this usable for amateurs who never worked with keylogger?

Do i need something to have to keylogger work? Or i just pay and i can use it without any other third party programs?

How does this keylogger works? I am looking for something that i can setup on my pc and them send file to somebody via e-mail, then person open it and keylogger should install silently without notice. Basically it should look like blank file that do nothing. Is your keylogger capable of such things like silent remote install?

And last: How does getting logs work? I got file whitch contain screenshots, passwords, keystrokes and such things?

I am overall very interested in this keylogger. Thanks for answering for my dumb questions, i just started and learning how does keyloggers works.

Matiex - July 2, 2020, 2:49 pm

- Sure i have an e-book to how to use Matiex for begginers and how to setup matiex, i will assist anyone with good time

- If you wanna get FUD output you need a crypter

- Read the TOS. Also Matiex is Stealth

- it have difference Delivery Telegram and FTP - SMTP - Discord

If you wanna ask more question, contact me in skype or DM me here

Matiex - July 5, 2020, 3:29 am

Update Pushed.

- Downloader Updated.

- Terminate Disable Fixed.

- Builder Process Updated.

Stanley - January 18, 2021, 7:36 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
