Thread: [Phone unlocking for the most mobilephone's](#)

FireFLame - March 26, 2009, 5:19 am

Most phones will need a data cable to connect your Handset to the PC.

Most models catered for

- Ericsson: (virtually all models covered)
 - LG: (virtually all models covered)
 - Mitsibushi: (virtually all models covered)
 - Motorola: (virtually all models covered)
- => also V3 - Black, Blue, Green, Pink & Silver
- NEC: (virtually all models covered)
 - Nokia: (virtually all models covered)
 - Panasonic: (virtually all models covered)
 - Philips: (virtually all models covered)
 - Sagem: (virtually all models covered)
 - Samsung: (virtually all models covered)
 - Sharp: (Inc. GX™s) (virtually all models covered)
 - Siemens: (virtually all models covered)
 - Sony: (virtually all models covered)

You can do the upgrade at home/work with a USB cable in 20 minutes
all you require is a 'USB to mini-USB' cable to connect your V3 Handset to the PC
this cable is normally provided with your phone.

So how exactly does this unlock your phone?

FireFLame - March 28, 2009, 1:30 am

When you type 3 time's your pin wrong. you get locked.

Then you use one thing from the post, and you try to get it unlocked.
Also you can play again with the pass.

ellusoft - March 28, 2009, 8:05 am

Thanks but I prefer to not have a virus on my phone

Jinx13 - March 30, 2009, 4:29 pm

You can only unlock certain phones with certain tools eg- SE xs++ setool a2uploader or new nokias with BB5 etc

nanook - July 30, 2015, 1:26 am

hi. The link dosent work. please upload again
