Thread: [how to fix codedom error?](#)

sara_221540 - June 26, 2020, 7:45 pm

i tried to use c# codedom to compile code in text file but i get the error
"Line number 16, Error Number: CS0234, 'The type or namespace name 'Net' does not exist in the namespace 'System' (are you missing an assembly reference?);"

SaketSaket - June 27, 2020, 12:07 am

Provide code to get solution... Regards...

?????????????????
?????????????????
WHAT DO YOU MEAN?

"Line number 16,error Number: CS0234, 'The type or namespace name 'Net' does not exist in the namespace 'System' (are you missing an assembly reference?);"
Code "Line number 16, _error_ Number: CS0234, 'The type or namespace name 'Net' does not exist in the namespace 'System' (are you missing an assembly reference?);"
On line 16 of the code you're trying to compile
Code Line number 16
You're trying to use a reference in System.Net, on line 16.
Code 'The type or namespace name 'Net' does not exist in the namespace 'System'
Spoiler [\(Click to View\)](#) You are
Code "(are you missing an assembly reference?)"

Either you haven't added your Using statements or you didn't add the assembly when you compiled with codedom.

Adding reference assemblies with codedom.
