Thread: [New flu strain with "pandemic potential" found in China.](#)

Dragon_One - June 30, 2020, 1:46 am

A new flu strain with "pandemic potential" has been found in pigs in China.

What are the statistical odds of TWO pandemics starting in the same country and both occurring in less than one year?

I'm starting to think that maybe this isn't happening naturally.

i'm pretty sure all these things are done intentionally...

Sterling Malory Archer - June 30, 2020, 1:58 am

Not surprised.

Now the only thing that is left to be seen, a nuclear war. ???

It takes literally hundreds of years for viruses to mutate to be able to infect different species.

Xerotic - June 30, 2020, 2:01 am

If you took the population of China and subtracted the population of the United States, China would still have over a billion people.

They are just that heavily populated. Increased population density increases the chances of an epidemic.

That being said... I'd never rule out what any government is capable of. I would not be surprised if most major governments weren't experimenting with stuff like this in some capacity.

I am not a scientist, and biology is not my field, if i may ask, since you said it takes hundreds of

years for a virus to mutate, does it mean corona virus has been in existence for hundreds of years?

Bats are natural carriers of Corona viruses.

So they are evolving together for a very long time.

It is just that some idiot had a VERY LUCKY bat-soup somewhere and that sunk the world now.

hmmm...so technically, all of these viruses have been existing in some kind of hosts for a very long time....so, why do we humans use our own hands to bring trouble to ourselves? by having some bat-soup or pig-soup ???

Chinese consider such troubles as 'delicacy'.

L0RE - June 30, 2020, 2:31 am

I doubt it'll be that bad

Method - June 30, 2020, 3:04 am

either china just mad unlucky all the time or everyone's deep down suspicions about them over the last decade are more than accurate.

Yeah we're talking about an extremely over populated country that just recently took digs of list of farmable animals.

Trying to feed that many people is going to be hard to keep sanitary

Stepdad - June 30, 2020, 3:21 am

Jesus Christ, it just never ends.

The government are the biggest crooks in the world. We are run by criminals.

You don't even know what day it is, let alone what's going on in the world, you space cadet.

Eagle 95 - June 30, 2020, 3:53 am

Don't rule out the possibility of anti-Chinese propaganda, too.

Eladictococy - June 30, 2020, 7:48 am

So, here we go again?. Another one?. I hope not.

MarvinMalware - June 30, 2020, 9:27 am

Great, this is just great. Statistics seem to have been thrown in the trash, really makes you question if these things are truly a mistake.

(Jun 30, 2020 01:58 AM)Sterling Malory Archer Wrote: [\[CITE\]](#) Not surprised.

This is damn true, I just been waiting on it. It feels like there's so much tension going on in the world right now. I mean Washington DC is literally on the brink of a civil war and it's being kept out of media. Plenty of other countries and cities protesting and rioting, it's wild man.

Artisan - June 30, 2020, 10:04 am

People in most countries are on the brink of losing their patience and giving way to acts fueled by hopelessness and rage. I only hope that no new pandemic or aggravating event occurs before we get rid of the current crisis.

Beherit - June 30, 2020, 11:59 am

Well, 2020 is not over and I'm just wondering if these things could have been prevented.

Check the patent that Covid-19 has.

The head of the Wuhan biological centre is owned / funded by who? The head of the Harvard university specialised in ... exactly!

But since they consider this as "fun", what could be their motive? at least, there is always a reason behind every action

Yin Yang - June 30, 2020, 2:51 pm

It's gonna happen when animals are pushed and forced to be right next to one another.

test - June 30, 2020, 3:02 pm

How long until we isolate that armpit of a country.

Who Soup - June 30, 2020, 3:05 pm

Can we just send in the opps to take out Winnie the poo just like they did bin laden?

It's not and it's man made. The elite is doing a culling by thinning the herd meaning they're doing population control.

google search population control and look for culling on jessie ventra. There's a lot of content on the internet about this and this been talked about for years.

Level - June 30, 2020, 5:26 pm

I highly doubt it, seems like the global agenda is doing well with the current one already going on.

Accord - June 30, 2020, 5:35 pm

Ive read a meme about china releasing covid-19 pro max, didnt knew theyll release it this year

Yanix - June 30, 2020, 6:56 pm

Oh no not again please....we are not over with pandemic covid-19 yet another one is threatening the whole world again :(

Gary Clark Jr. - June 30, 2020, 7:39 pm

Uh oh a H1N1 x Covid collab no one asked for...

Better not call this the Swine Flu 2 or cops are gonna be offended.
