Hi, I dislike methods that requires investment, but most of times this is necessary...

In this opportunity I want to show you how can you make from \$ 10 near \$ 25, with \$ 20, \$ 50, and so on (aprox. % 150 of interest).

The only that you need in this case is to have at least \$ 10 to register in this site

<https://www.popads.net> and buy ads.

Then you need to register in the Paxful affiliate program, that is this: <https://paxful.com>

Paxful will pays you % 50 of each transaction that makes your affiliates from level 1 and % 10 from level 2.

A good thing of this affiliate program is that you can withdraw your money with only \$ 10 in your account and instantly!!!

Once you have registered in both sites go to PopAds and deposit your money.

Then start a new campaign and set your min. bid near \$ 0.05 per mil impressions (it's to say, 0.00005 per bid). Also try to set your audience to Finances, Money, etc.

With this minimum bid (\$ 0.05 per mil impressions) and with \$ 20 (for example) you can get 400,000 impressions, that converts near 20 affiliates, half will be active aprox. in near 2 or 3 day and perhaps they will make a transaction each one. Suppose each transaction is about \$ 5 min, so you will get aprox. at least \$ 50 with the \$ 20 investment!!!

As you have seen it is a very simple but highly lucrative method.

I hope you can put in practice and make a good amount.

Without more,

Kin regards and good luck!
