Thread: [how to run an .exe file on my client, from my rat?](#)

b1nary21 - June 30, 2020, 6:00 pm

Hello

I am using async rat, this rat has a keylogger, however I want to run another keylogger that works offline inside my client,
how can I run this keylogger from async rat on my client's pc?

<https://ibb.co/NWJsZ5b>

<https://ibb.co/th1QrSX>

thus? or as?

It's better to use "RunPE". vbc if native file, regasm if dotnet file.

thanks u nyan
problem solved, thanks

p.s: on the other hand, answer my message :(I want to acquire masslogger
